- 1. Paper: "[Object retrieval with large vocabularies and fast spatial matching](#)"
  - Introduces a method for object retrieval using bag-of-words representations and spatial verification
  - Proposes an efficient spatial verification technique to improve retrieval accuracy with large vocabularies
- 2. Paper: "[Building Rome in a day](#)"
  - Presents a method for large-scale reconstruction of urban environments from Internet photo collections
  - Demonstrates the scalability and effectiveness of the approach by reconstructing Rome's landmarks from thousands of Flickr images
- Presentations will take place on 05.06.2024
